

Emily Carter

Frontend Software Engineer

Charlotte, NC • (704) 555-0148 • emily.carter@email.com • linkedin.com/in/emilycarter • github.com/emilycarter

SUMMARY

Frontend engineer with 3 years of experience building responsive, accessible web applications with React and TypeScript. Comfortable owning features end to end—from design handoff to production—with a focus on component reusability, performance, and clean, well-tested code. Collaborative team member who enjoys mentoring juniors and improving developer tooling.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript (ES6+), HTML5, CSS3/Sass
Frameworks & Libraries	React, Next.js, Redux Toolkit, React Query, React Router, Tailwind CSS
Testing	Jest, React Testing Library, Cypress, Playwright
Tooling	Vite, Webpack, ESLint, Prettier, Storybook, Git, npm/pnpm
Practices	Responsive design, Web accessibility (WCAG), CI/CD, Agile/Scrum, REST & GraphQL

EXPERIENCE

Frontend Engineer

Jun 2023 – Present

Brightwave Technologies — Charlotte, NC

- Built and maintained customer-facing dashboards in React and TypeScript serving 40k+ monthly active users, improving page load time by 35% through code-splitting and lazy loading.
- Designed a shared component library in Storybook adopted across 4 product teams, cutting new-feature UI development time by roughly 25%.
- Migrated a legacy class-component codebase to React Hooks and TypeScript, reducing runtime type errors and improving maintainability.
- Raised unit and integration test coverage from 45% to 80% using Jest and React Testing Library, lowering production regressions.
- Partnered with designers and backend engineers in an Agile team to ship features on a biweekly release cycle.

Junior Frontend Developer

Jul 2022 – May 2023

Nimbus Apps — Raleigh, NC (Hybrid)

- Developed responsive, accessible UI components with React, TypeScript, and Tailwind CSS for a B2B SaaS platform.
- Integrated REST and GraphQL APIs using React Query, improving data-fetching reliability and reducing redundant network calls.
- Implemented WCAG 2.1 AA accessibility fixes, bringing key flows to compliance and improving keyboard navigation.
- Collaborated in code reviews and pair-programming sessions, contributing to team coding standards and ESLint configuration.

PROJECTS

TaskFlow — Kanban-style task manager | React, TypeScript, Vite, Zustand

- Built a drag-and-drop board with optimistic updates and persistent local storage; open-sourced with 300+ GitHub stars.

WeatherNow — Progressive web app | Next.js, TypeScript, OpenWeather API

- Implemented geolocation, offline caching via service workers, and a 95+ Lighthouse performance score.

EDUCATION

B.S. in Computer Science

2018 – 2022

University of California, Los Angeles (UCLA)
